DATASHEET | DS-T0337

Horizontal Pullback Window Cutter

3 - 11 MM TUBE GUIDES

The OPT Services Horizontal Pullback Window Cutter is a precision instrument specifically designed to create a longitudinal slot (or window) in fibre optic tubing or internal and external cables with strength members. This allows access to the individual fibre elements within the cable, enabling the user to drop off one or more fibres (or customers) at a single breakout point.

The tool typically creates a window length of between 20 – 50mm depending on the tube guide being used.

All our tools are designed and manufactured in the UK to very high standards and tested to provide a precise and long-lasting service.

Features & Benefits

- Hard-wearing anodised aluminium construction.
- Inter-changeable tube guides between 3 & 11mm.
- Compact & low profile when closed.
- Cuts on front of cable for easy access to the fibres.
- Cable grips prevent tube movement when cutting.
- Ergonomically styled handles.
- Lightweight & easy to use – horizontally or vertically.
- Non-slip / non scratch base.
- Wrist strap included when using at height.
- Manufactured and assembled in the UK.
