SlimLine™ Capping

Also available separately – see DS-T0330

The OPT Services SlimLine™ Capping is a range of complimentary products designed to cover and protect cable entry into any premises.

It uses an aesthetically reduced footprint design, to minimise visual impact.

The set is designed as an alternative to the standard BT Capping 25, Connector Bend No.4 and the Cover 101A.

We also offer a complete range of accessories to compliment SlimLine™ Capping. See the SlimLine™ Capping Accessories Datasheets 1 and 2 for details of our Elbow Capping, the T-Piece and the Capping Angle; the Capping CLI and the Capping Cable clips. Also available is the Flexible Capping – See the SlimLine™ Flexible Capping Datasheet for information on this.

Features & Benefits

- Reduced visual footprint of cable entry on any premises.
- 50% less material than existing Capping products.
- Protects underground duct and external cables against damage.
- Compatible with any products that use the Capping 25 products, and our own Compact Customer Connection Interface (CCCI). Other adapters made available on request).
- Supports 2 x cables of up to 9mm each in diameter.
- Unique in this sector - inclusion of knockouts and cable separation to allow multiple network providers to use the same capping.
- Everything included for straightforward installation.
